DETAILED ACTION

*** This office action is in response to Applicant's RCE filed December 15, 2005 and Amendment submitted November 14, 2005. Claims are 1-5,10,13-17, and 22 are pending.

Allowable Subject Matter

- 1. Claims 1-5,10,13-17, and 22 are allowed.
- 2. The following is a statement of reasons for the indication of allowable subject matter:

Applicant's amendment and convincing remarks filed November 14, 2005 have overcome the rejections in the last office action. The references of record including Papasouliotis (6,846,745), Hanawa (5,753,044), etc., alone or in combination, do not fairly anticipatively disclose each and every aspect of the claimed high-density plasma CVD process, or fairly make a prima facie obvious case of the claimed process, in combination with other processing claimed limitations as recited in base claims 1 and 13, the inclusion of injecting first main process gases including a silicon source gas, an oxygen gas, a nitrogen free chemical gas and a hydrogen gas (helium gas also included the first main process gases of claim 13) into the process chamber to generate a high density plasma over the semiconductor substrate and to simultaneously form a silicon oxide layer on the semiconductor substrate; after injecting of the first main process gases, injecting second main process gases including a silicon source gas, an oxygen gas, a nitrogen free chemical gas, a hydrogen gas and a helium gas (helium gas not included the second main process gases of claim 13); and after injecting of the second main process gases, injecting third main process gases including a silicon source gas, an oxygen gas, and a hydrogen gas, wherein the semiconductor substrate is heated to a temperature in a range of about 550°C to about 700°C.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Michael M. Trinh whose telephone number is (571) 272-1847. The examiner can normally be reached on M-F: 9:00 Am to 5:30 Pm.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Zandra Smith can be reached on (571) 272-2429. The central fax phone number is (703) 872-9306.
